

Miltonia Research

Monthly Report - Mar 2026

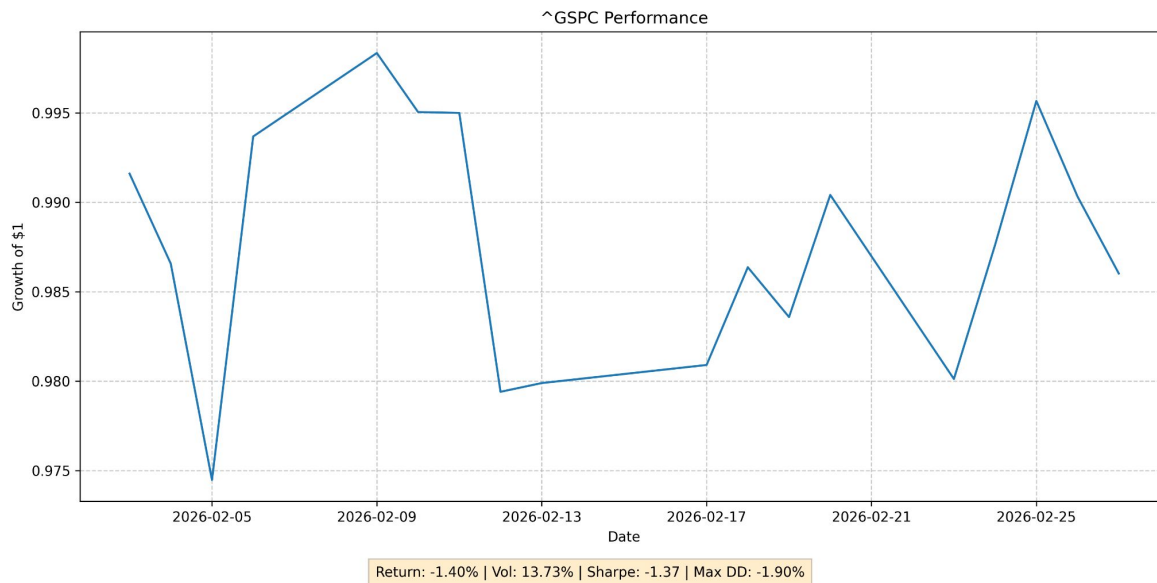

What is Miltonia Research (MR)?

- MR is a trading project focused on **systematic trading** to drive consistent returns alongside automated reporting and risk management. MR also aims to drive consistent **quantitative research** to seek out trading opportunities and methodologies
- AUM as of Mar 2025: **10,000 SGD (7,896 USD)**
- Asset allocation

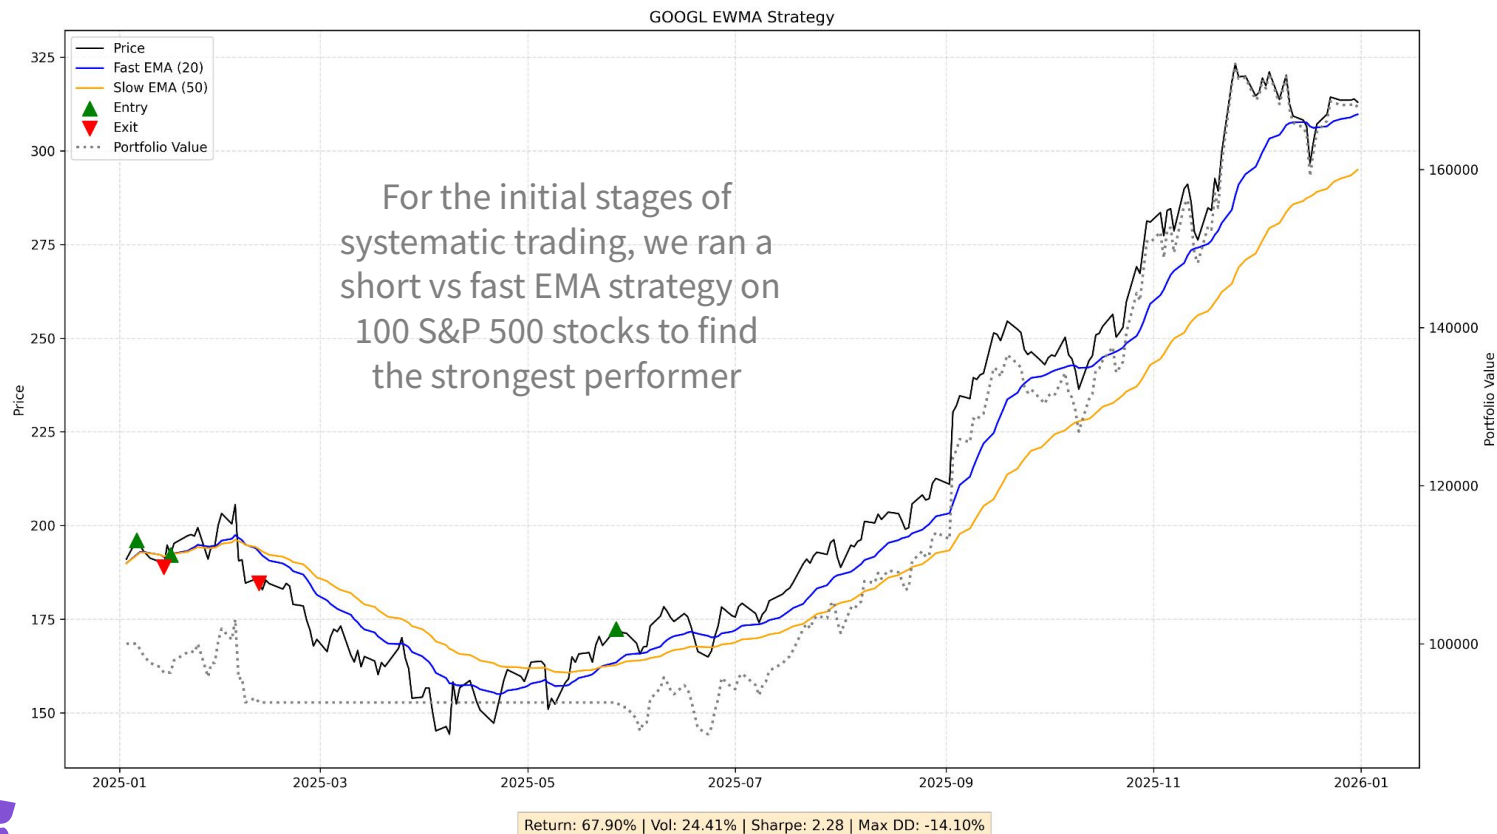

Benchmarking

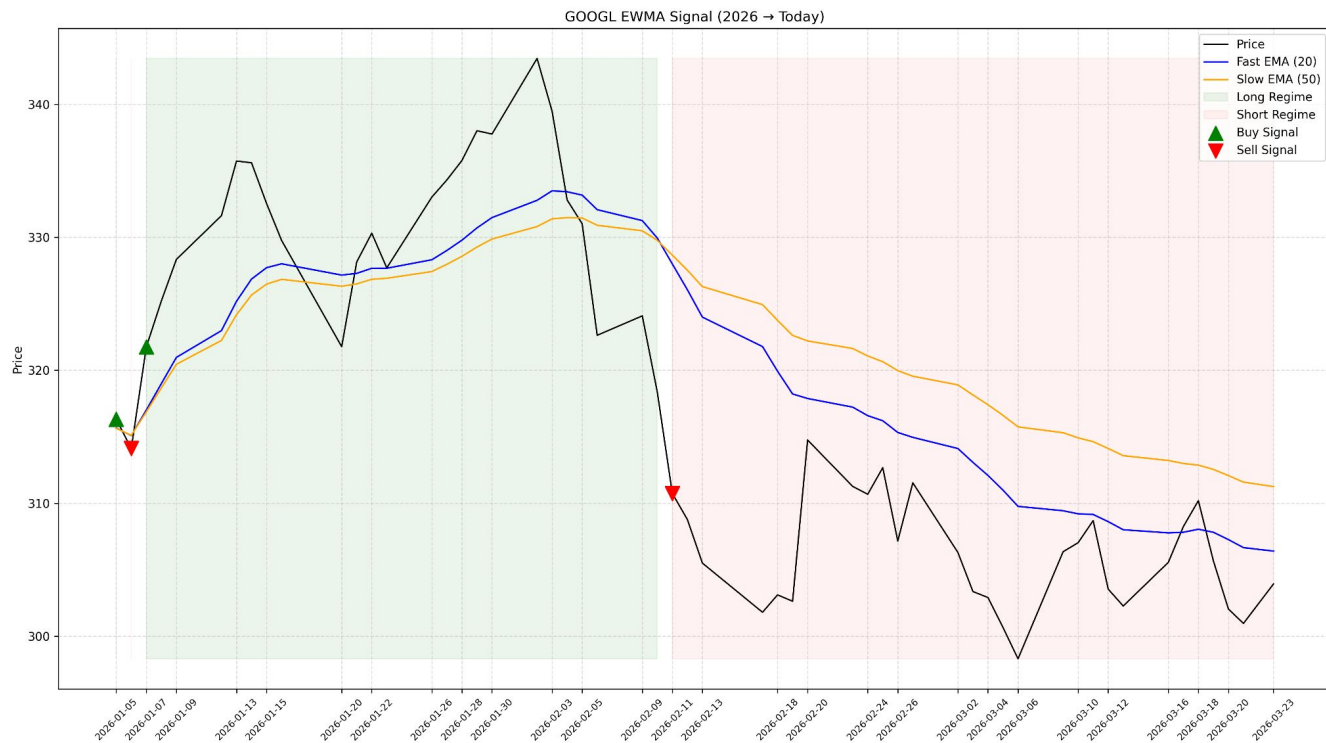

We benchmark against the S&P500. We aim for moderate market exposure with a significant systematic / discretionary allocation

Systematic Trading: Backtest Performance

Systematic Trading: Actual Signal Generation

**WAITING FOR
REGIME FLIP
THEN GO LONG**

Systematic Trading: From Manual to Automated

Week 1: signal generating scripts were run manually to check for errors. Trades placed

Week 2: signal generating scripts were incorporated with IBKR API to execute automatically after a manual run every evening

In April, we aim to host the scripts on AWS to automate the entire process

Discretionary Trading

TRADE OPTIONS SUA

Performance (Mar 2026)

In our first month of trading, we made a total return of USD \$XX, exceeding the S&P

	S&P500	Miltonia Research
1 Month Vol (σ)		
Max Drawdown (MDD)		
5% Value at Risk (VAR)
